## **South River Technologies Releases Titan FTP Server Version 2.0**

---

Annapolis, MD - December 5, 2002 - South River Technologies, a leading developer of Internet Utilities for file transfer and collaboration, announced today the release of version 2.0 of their Titan FTP Server software. Titan FTP Server is an enterprise class server product for storing and sharing files.

The new version adds increased performance capability to a fully featured FTP server. The server offers personal and enterprise versions, to suit the needs of the largest enterprises to the home user.

"By working with several of our Enterprise customers, we've been able to achieve significant performance gains in a real-world environment," said Michael Ryan, Chief Technology Officer for South River Technologies. "When you consider the increased performance, rich feature set and overall ease of use, Titan offers a cost-effective solution for file storage, transfer and collaboration."

### **About South River Technologies**

Founded in 1996, South River Technologies develops file management software which is used for file collaboration, shared access and website management. All SRT products include strong security to provide encrypted data transfer. This unique client technology, commercially available as WebDrive®, integrates into the Windows environment, creating an instantly familiar interface for the end user, reducing training and support costs. This technology is also licensed to independent software vendors to add functionality to existing product suites. ISPs can also license re-branded versions of our products as an add-on to their service offerings.
